17. Special technical functions in interiors
18. Application of ergonomic guidelines in interior design
19. Custom-designed wall-mounted furniture for homes
20. Formal attire
21. Style collections
22. Collection for unique body shapes
23. Stage costumes (bands, choirs, performing actors, etc.)
24. Special garments (dance, special occasions, etc.)
25. Children's clothing
26. Application of smart materials in design
27. Areas of application for clothing electronics (LilyPad)

28. Development of interactive clothing
29. Lingerie and swimwear
30. Specialized sportswear
31. Leisure clothing
32. Work and protective clothing
33. Eco-conscious design, recycling
34. Reinterpretation of folk motifs in clothing design
35. Tradition and high-tech
36. Clothing and accessories for individuals in special life situations
37. Leather clothing accessories
38. Bag collections (for different functions)
39. Small accessories collections in leather, textiles, etc.
40. Women's/men's footwear collections
41. Leather clothing
42. Reinterpretation of traditional leather ornamentation techniques for a specific collection

### **Packaging Design Specialization (BSc E, BSc F curricula)**

1. Design of injection-molded products from PLA
2. Design of mesh packaging for new product categories
3. Replacement of secondary packaging with multi-use commercial storage elements
4. Design of shelf-ready packaging for can-sealed products
5. Practical bundling and presentation packaging for "cup" soups
6. Ergonomic design of large plastic packaging equipment
7. Attractive jewelry packaging design
8. Corporate branding elements on corporate gift packaging
9. Design of display stands (for various products)
10. Development of new products
11. Redesign of existing products, product development
12. Packaging design that matches an existing brand identity
13. Private label food packaging
14. Paper-based packaging
15. Advertising-focused packaging design and graphic design
16. Branding for product families
17. E-commerce packaging
18. Game packaging
